

# CS25

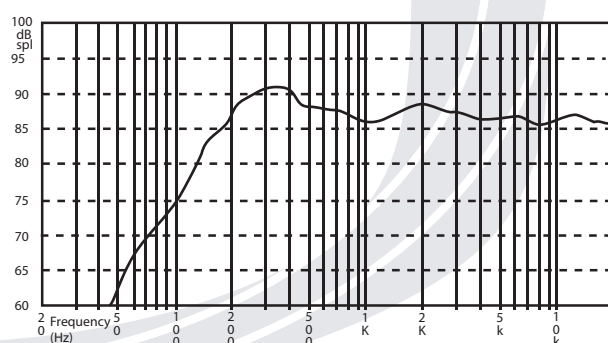

## MORE IMPORTANT THAN POWER : PRESENCE

This ceiling loudspeaker of small diameter is particularly interesting for the architects. CS25 will surprise you by its characteristics in dynamics, in spatializing and by its absolute clarity for musical restitution. Its exclusive patented technology ATAO Audio System<sup>®</sup> will offer you a homogeneous diffusion that assures you an excellent quality of reception.

Aesthetic and discreet, it integrates with the decor becoming quasi invisible. With an excellent audio quality, it assures an amazing spread of acoustics and can broadcast any types of sound messages, thanks to its form and size, CS25 can be alternated in a ceiling with halogen spotlights. An ingenious system of assembly allows an easy and quick installation including in false-ceilings.

**The patented process Atao Audio System<sup>®</sup> allows a reproduction and a broadcasting of true sound close to direct listening.**

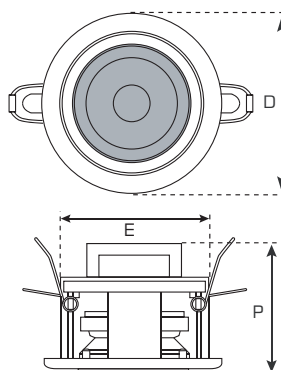

Frequency Response between 150 Hz and 20 KHz

### Technical characteristics

|                  |                 |
|------------------|-----------------|
| Boomer :         | 55 mm, paper    |
| Power :          | 6 W             |
| Impedance :      | 100 V           |
| Transformer :    | 3 / 6 W         |
| Band passer-by : | 135 Hz – 20 KHz |
| Sensibility :    | 88 dB           |
| Finishing :      | white           |
| Weight :         | 0,5 Kg          |
| Material :       | ABS             |

### Dimensions

Diameter D : 103 mm  
Depth P : 90 mm  
Diameter of embedding E : 95 mm
